RC-Timing

Oberhasli, Switzerland

1 Introduction

With the two websites www.myrcm.ch and www.Rc-timing.ch RC-Timing offers two interesting services to their customers.

www.myrcm.ch: Free of charge you can upload the results of your events and make them accessible to the public. This can also be done up-to-date when an event is running. The very high number of visitors of MyRCM shows that this service is very popular with the drivers. This service is also a good promotion for your club respectively your event. As said, this service is free of charge for you as a customer of RC-Timing.

Further on you can receive entries for your events online via MyRCM. This special service has to be activated on your request by us, but it is free of charge too.

Last but not least offers www.myrcm.ch together with the timekeeping software RCM Ultimate a very special service: Online streaming. This service is not free, but the fee per year is very reasonable. Using RCM Web Publisher you can visualize the actual ranking list produced by RCM Ultimate on MyRCM. This allows to keep anybody worldwide informed about the racing on the track.

www.Rc-timing.ch: Here you find in the customer zone the current updates and other information for the programs you have bought.

2 Preparations

Beening a customer of RC-Timing you have received the following email after purchasing the first software:

Hello Mr XXXXXX

Following your personal data to login into our customer zone.

Under Licence you will find all necessary data to install the RCM Application:

- *Licencedata*
- *Setups Updates*
- *Setups Fullversions*

Customer Zone Accessdata

Host: www.Rc-timing.ch

User: XXXXXX

Passwd: YYYYYYYY

FTP Accessdata (MyRCM Service)

Host: www.myrcm.ch

Port: 22

User: xxxxxx

Passwd: xxx9XXx9

If you have any question, don't hesitate to ask us.

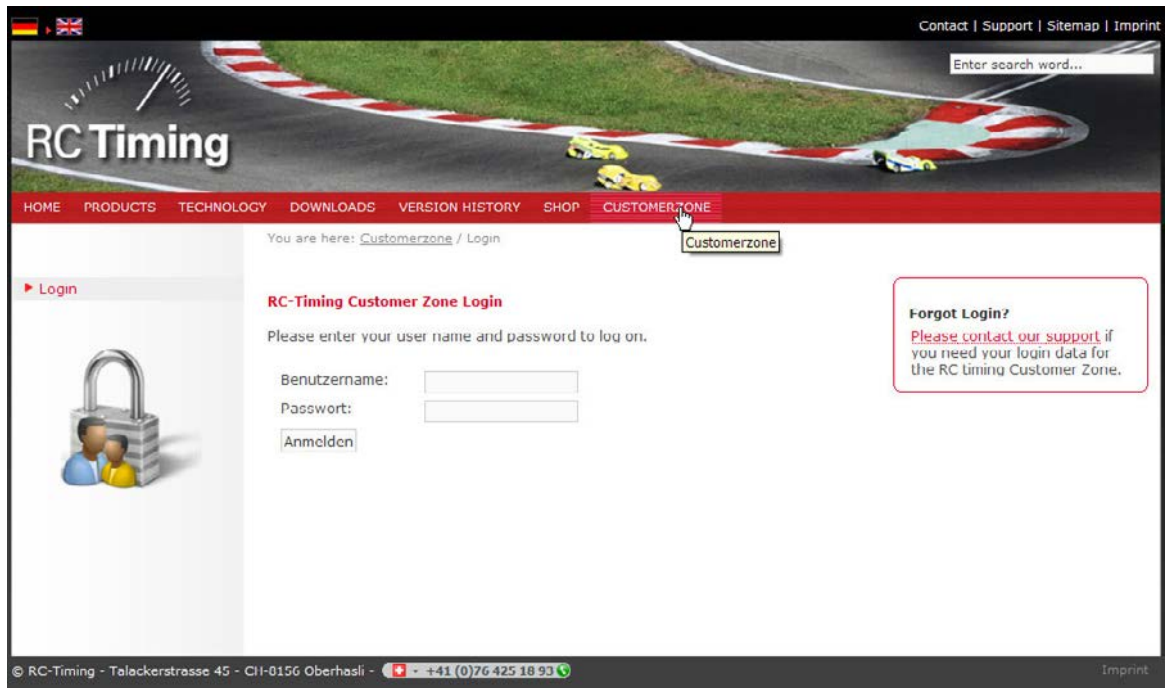

Best Regards

RC-Timing

In this email you find all the necessary data to use the two websites in the future. With the customer one accesdata you log in to the customer zone on www.Rc-timing.ch as well as www.myrcm.ch. The FTP accesdata is used to upload the results of an event from RCM Ultimate to MyRCM. Please note that the username and the password is case sensitive.

3 Customer zone on Rc-timing.ch

Access www.Rc-timing.ch with your internet browser. You can log in with the menu Customerzone.

You enter the login window. Now you need the Customer zone accesdata you got with the email:

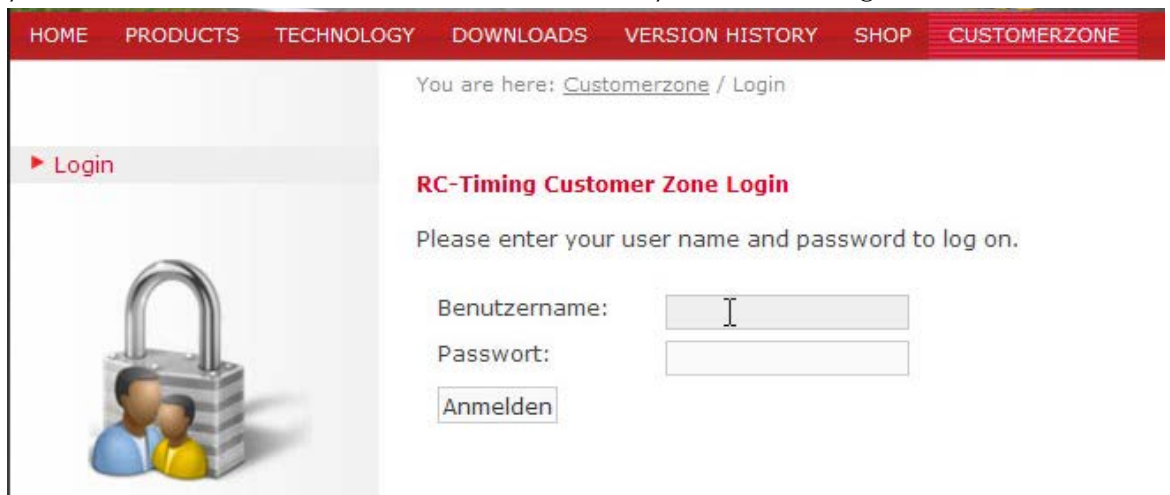

Customer Zone Accesdata

Host: www.Rc-timing.ch

User: XXXXXX

Passwd: YYYYYYYY

In the line username (Benutzername) you enter the user and in the password line you enter what is written behind Passwd: Now you click on login.

All the data of the programs you purchased are now displayed (or by clicking on Licences in the left menu). In the header of each program you find the necessary data to activate your copy of the software (SerialCode, AccessCode und Contractnumber). Make a note of this data. After launching an RCM software the first time, you have to enter the numbers for activating the program.

The screenshot shows the 'Licences' page for 'Race Control Management Ultimate'. The page has a red header with navigation links: HOME, PRODUCTS, TECHNOLOGY, DOWNLOADS, VERSION HISTORY, SHOP, and CUSTOMERZONE. A search bar is in the top right. The left sidebar contains a menu with 'Licences' (selected), 'Activation', 'Support', 'Download', and 'Logout'. The main content area displays the following information:

Race Control Management Ultimate

Downloadlink:	Race Control Management Ultimate										

In the lower part you find the information of the current versions of the program (full version and update). By clicking on the downloadlink you can download the desired install program. Please install the program as described in the user manual of each program.

On a computer the program is not installed, you have to install the full version. If there is a newer update, you install this update after the full version. An update contains only the new and not all files of a program. Therefore for a completely new installation you to install the full version first. If the program exists on your computer, you run only the installation of the update.

If you have a demo-version on your computer and you have already entered all your data, you only have to install the update, This will not destroy your data. After the installation of an update over a demo-version, you have to enter the final registration codes to activate the program.

In the left menu just below Licences you find Activation. This is used for activate a RCM program on a computer without access to the internet. Please refere to the handbook of the RCM program.

With Support you can create tickets which are used to inform RC-Timing on bugs you have found in an RCM program and/or to suggest improvements of an RCM Program. Clicking on Overview you see the status of your tickets.

The screenshot shows the 'Create Ticket' page in the RC Timing Customerzone. The page has a red header with navigation links: HOME, PRODUCTS, TECHNOLOGY, DOWNLOADS, VERSION HISTORY, SHOP, and CUSTOMERZONE. A sidebar on the left contains links: Licenses, Support, Overview, **Create Ticket**, Download, and Logout. The main content area is titled 'Create Ticket' and contains a form with the following fields:

- Application (*)
- Classification (*)
- Customer (*)
- Name (*)
- Prenome (*)
- E-Mail (*)
- Title (*)
- Description (*)

The form is pre-filled with the following information:

- Application: ?
- Classification: ?
- Customer: Heiner Martin
- Name: Martin
- Prenome: Heiner
- E-Mail: heiner.martin@rc-timing.ch
- Title:
- Description:

In Downloads special additions for your RC; programs can be found, for example rules.

The screenshot shows the 'Downloads' page in the RC Timing Customerzone. The page has a red header with navigation links: HOME, PRODUCTS, TECHNOLOGY, DOWNLOADS, VERSION HISTORY, SHOP, and CUSTOMERZONE. A sidebar on the left contains links: Licenses, Support, **Download**, and Logout. The main content area is titled 'Downloads' and contains a table with the following columns: Title, Author, Date, Filesize, and Categories. The table lists several downloads, each with a 'more' and a 'download' link.

Title	Author	Date	Filesize	Categories
EFRA 1/10 Track 200 mm	Felix Romer	04/07/2011	4.6 KB	Reglemente [more] [download]
EFRA 1/8 Offroad	Felix Romer	04/07/2011	4.6 KB	Reglemente [more] [download]
EFRA 1/8 Track	Felix Romer	04/07/2011	4.6 KB	Reglemente [more] [download]
EFRA Electric 1/12	Felix Romer	04/07/2011	4.6 KB	Reglemente [more] [download]

EFRA Large Scale Touring Cars	Felix Romer	04/07/2011	4.6 KB	Reglemente [more] [download]

By clicking on Logout you log out from the customerzone.

The screenshot shows the 'Logout' page in the RC Timing Customerzone. The page has a red header with navigation links: HOME, PRODUCTS, TECHNOLOGY, DOWNLOADS, VERSION HISTORY, SHOP, and CUSTOMERZONE. A sidebar on the left contains links: Licenses, Support, Download, and **Logout**. The main content area is titled 'Aktueller Status' and contains the text 'Das ist Ihr aktueller Status:'. Below this text, there is a form with the following fields:

- Benutzername: martin3
- Abmelden

If you want to change your customer data or your password, you have to do it on MyRCM.
The user manuals can be found in in the main menu in Downloads and then Documentation. Select the program you need and on the right side of the window you can download the user manual by clicking on the downloadlink.

The screenshot shows the RC Timing website interface. At the top, there's a header with flags (Germany, UK) and navigation links: Contact | Support | Sitemap | Imprint. Below the header is a search bar with the text "Enter search word...". The main navigation bar includes links: HOME, PRODUCTS, TECHNOLOGY, DOWNLOADS, VERSION HISTORY, SHOP, CUSTOMERZONE. The breadcrumb trail reads: You are here: [Downloads](#) / [Documentations](#) / RCM Ultimate.

On the left sidebar, under "Documentations", the following items are listed:

- Rules
- Freeware
- Demo versions
- Documentations
 - RCM Ultimate**
 - RCM Professional
 - RCM Advanced
 - RCM Beginners
 - RCM Light
 - RCM Online Easy
 - RCM Publisher
 - RCM Publisher VGA
 - RCM WebPublisher
 - RCM Voice
 - RCM Board
 - RCM Signal
 - RCM Registration
 - RCM Kart

The main content area displays three download options for RCM Ultimate:

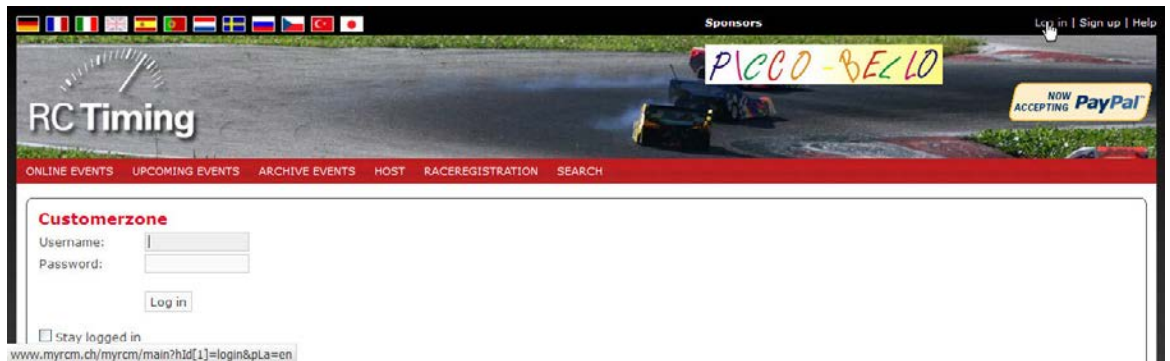

RCM Ultimate Benutzerhandbuch	
Filetype:	PDF

Downloadlink:	RCM Ultimate Benutzerhandbuch (A5 Format)

RCM Ultimate Usermanual	
Filetype:	PDF
Language:	English
Filesize:	15.87 MB

4 Customer zone on MyRCM.ch

To login as a customer in the customer zone of MyRCM you have to click on Sign-in in the upper right corner of the welcome screen.

In the loginwindow you need the same customer zone accessdata like on RC-Timing:

Customer Zone Accessdata

Host: www.Rc-timing.ch

User: XXXXXX

Passwd: YYYYYYYY

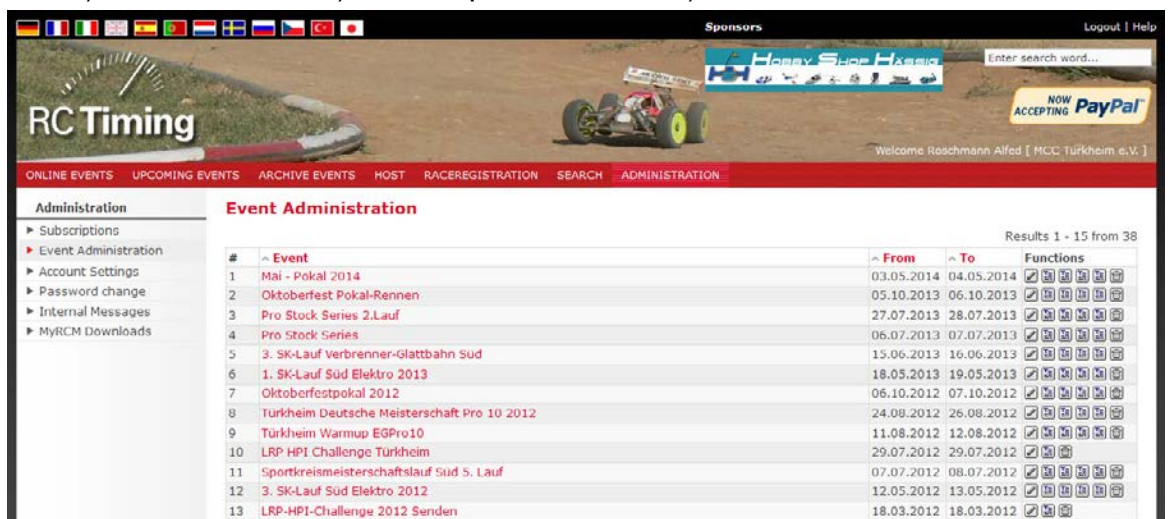

In the line username you enter the user and in the password line you enter what is written behind Passwd: Now you click on login.

After a successful login you will find an additional tab "Administration". This section is selected automatically after a login. On the left side you find five menu items you can choose.

4.1 Eventadministration

Here you see all events you have published on MyRCM until now.

You can delete certain events. Just click in the row functions on the trash symbol. You have to confirm the deletion once again and after that the event will be deleted. Please use this function only if a event was published on MyRCM wrongly or an event was published twice, which can happen if you have created an event twice in RCM Ultimate.

Further on you can add fields to the registration form and enter additional Text for the registration. Use the buttons right of the event.

You can also edit the data for your event. Just click on the pencil.

In this window you can edit all the data of your event. And, very important, you can define whether a registration for your event on MyRCM is possible or not and in which time period. Please note, that this function is only active, if the raceregistration is configured for your account.

Just activate the small box behind "Raceregistration" if you want the racers to send their registration through MyRCM. Below of that you can define the time period allowed for the race registration. Please note, that most of the function can also set in RCM Ultimate.

4.2 Registrations

In this window you see the entries you got via MyRCM.

#	Event	From	To	Count	Functions
1	Mai - Pokal 2014	03.05.2014	04.05.2014	2 / 0	[Icons]
2	Oktoberfest Pokal-Rennen	05.10.2013	06.10.2013	30 / 0	[Icons]
3	Pro Stock Series 2.Lauf	27.07.2013	28.07.2013	6 / 0	[Icons]
4	Pro Stock Series	06.07.2013	07.07.2013	6 / 0	[Icons]
5	3. SK-Lauf Verbrenner-Glattbahn Süd	15.06.2013	16.06.2013	35 / 0	[Icons]
6	1. SK-Lauf Süd Elektro 2013	18.05.2013	19.05.2013	27 / 0	[Icons]
7	Oktoberfestpokal 2012	06.10.2012	07.10.2012	23 / 0	[Icons]
8	Türkheim Deutsche Meisterschaft Pro 10 2012	24.08.2012	26.08.2012	46 / 0 / 0	[Icons]
9	Türkheim Warmup EGPro10	11.08.2012	12.08.2012	13 / 0	[Icons]
10	Sportkreismeisterschaftslauf Süd 5. Lauf	07.07.2012	08.07.2012	59 / 0	[Icons]
11	3. SK-Lauf Süd Elektro 2012	12.05.2012	13.05.2012	51 / 0	[Icons]
12	Oktoberfestpokal 2011	01.10.2011	02.10.2011	34 / 0	[Icons]
13	4. SK-Lauf Süd Elektro-Glattbahn	25.06.2011	26.06.2011	46 / 0	[Icons]

Just click in the list of the events in the column on the download-link and you get all entries as a CSV-file. This file you can directly import to RCM Ultimate. Licking on Registrationlist will display all entries already received. If there is an entry twice, you can delete it. Just click at the end of the line on the trash-symbol.

With the buttons right of the drivers you can select additional features. So you can edit the details of this registration.

4.2.1 Import the data in RCM Ultimate

If your computer where RCM Ultimate is installed, has access to the internet, you can download the entries directly in RCM Ultimate with Tools/MyRCM/Import. Otherwise follow the following steps:

The data is imported to RCM Ultimate with the function Tools/Datamanagement/Data Import. This import is only available if no event is loaded.

You select "Text with delimiters and header". Select the import file in the open file dialog (name is export.csv by default). By clicking on the three dots at the end of the input line, you can search the file on your computer. In the right column of the window you select "Actualize and append records". This is mostly used and is a combination of both functions above.

Next leads you to the next window where you have to select the table of the inventory data to which the file correspond. Here you select "Driverlist".

Clicking on Next opens another window. In the left column you see the names of the fields configured in the import file. The right column shows you the fields of the selected table of the inventory data. Using the magic stick will assign the fields automatically recognized by the program. Normally all fields are assigned automatically. If not, the fields can be assigned by marking these in the left and right column and clicking on right arrow button. Using the left arrow button will delete an assignment. An assignment will be shown in the right column in the column source field.

Data Import

Please create the necessary Fieldmatchings:

Datafields of Sourcefile		Fieldmatching to destination Table	
Pos	Name	Destination field	Source field
		Name	Name
		Vorname	Vorname
		Adresse	Adresse
		Postleitzahl	Postleitzahl
		Ort	Ort
		Land	Land
		Telefon	Telefon
		EMail	EMail
		Geburtstag	Geburtstag
		Block	Block

Navigation buttons: << Back, Next >>, Import, Cancel

When all assignments are done, you click on next and start the import in the next window by clicking on Import.

Data Import

Importstatus

New generated Records:	0
Actualized Records:	0
Erase Records:	0
Unused Importdata:	0
Import failure:	0
Current Importstep:	-

Importprogress

0 %

Navigation buttons: << Back, Next >>, Import, Cancel

4.2.2 Race registration

A driver can send you his entry by using the tab Raceregistration on MyRCM. He has to select the race in the table and then he has to click on Raceregistration.

#	Host	Block	Event	From	To	Count	Raceregistration
1	Fédération Monégasque de Modélisme	FMM	GP EFRA 2014	28.03.2014	30.03.2014	27	Raceregistration
2	NSWRCC	AARCMCC	Serpent Australia Tour 2014	28.03.2014	30.03.2014	49	Raceregistration
3	Rc Sta. Oliva	AECAR	Social Mini Z	28.03.2014	28.03.2014	6	Raceregistration
4	MK.Prvni Mini-Z Racer ČR	EFRA	8. KYOSHO International Mini-Z Masters 2014	28.03.2014	30.03.2014	106	Raceregistration
5	LESTR MODELS	LESTR CUP	8. LESTR CUP 13/14	29.03.2014	29.03.2014	41	Raceregistration

10	МАУ ДОД Ишимская СЮТ	ФАМС TO	5 этап Кубка Тюменской области 2013-14	29.03.2014	30.03.2014	33	Raceregistration
11	MAC Adenau	LRP / FAR	LRP-HPI-Challenge West	29.03.2014	30.03.2014	30	Raceregistration
12	England Park Raceway	QLD	Open Day - All Scales - 29-03-14	29.03.2014	29.03.2014	17	Raceregistration
13	RC1	XRAY	MORAVIA XRAY CHALLENGE	29.03.2014	29.03.2014	37	Raceregistration
14	C.A.V.S.A.	CAVSA	2ª CAVSA ELECTRICOS 2014	29.03.2014	30.03.2014	5	Raceregistration
15	Joensuu urheilutoilijat ry	EFRA	Itärossi - GP	29.03.2014	29.03.2014	39	Raceregistration

A window opens where the driver can enter all details. The lines marked with "*" are compulsory. After entering all details, the driver has to click on the submit button at the bottom of the form.

MyRCM Account Login

MyRCM has detected, that you have entered this registration page without login. If you should already have a MyRCM account, then please login over the following link. After the login, you will automatically be redirected to the registration page of this event again.

[Link to MyRCM login page](#)

If you would like to create a MyRCM account, so that during the next registration your contact data are adopted automatically to the registration, then please select the following link:

[Link to MyRCM registration page](#)

Event / Section

Event: GP EFRA 2014

Section (*): ?

Particulars

Last Name (*):

First Name (*):

Address (*):

Zip / Location (*):

Country (*): ?

E-Mail (*):

Phone:

Birth day: (DD.MM.YYYY)

Driver No.:

Club:

Team:

Block: ?

After a short time, a message is displayed, that the entry is registered successfully. Besides of the an email is sent to the driver with a confirmation of his entry.

If not all compulsory lines are not filled in (or there are some faults detected by MyRCM), the fields for the necessary corrections are marked light red and the driver can complete his entry.

The screenshot shows the RC-Timing website interface. At the top, there's a navigation bar with links: Online Events, Upcoming Events, Archive Events, Host, Raceregistration, and Administration. A search bar is also present. Below the navigation bar, a message states: "Thank you very much for your race registration. You will receive a registration confirmation mail within the next few minutes." Underneath, it says "Aebi RC Progress" and provides two links: "Back to registrations" and "Register more race registrations". At the bottom, there's a status bar showing "Online Visitors: 145", "Visitor Nr. 561038 since 21.12.2007", "v1.2.1 (12.09.2008)", and "Copyright © 2007 - Aebi RC Progress".

4.3 Account settings

Here you can change the data of your customer account. If your address or your email-address for example have changed, you should enter the changes here.

The screenshot shows the RC-Timing website interface with the "Account Settings" page. The page has a header with various flags and a "Sponsors" section. The main content area is titled "Account Settings" and contains a form with the following fields: Organisation (*), Salutation (*), Last Name (*), First Name (*), Address (*), Zip / Location (*), Country (*), Phone, Fax, Mobile, EMail (*), Birthday, and Web. The form is pre-filled with the following data: Organisation: Heiner Martin, Salutation: Mr, Last Name: Martin, First Name: Heiner, Address: Römerstr. 93, Zip / Location: 89077 Ulm, Country: Germany, EMail: heiner.martin@rc-timing.ch, Birthday: (DD.MM.YYYY). A "Save" button is located at the bottom of the form. The footer of the page shows the website URL, the number of members (14023), the number of streaming clients (4), the version (v3.5.2), and the date (20.03.2014).

Please note, that the link for your website must be complete, for example <http://www.Rc-timing.ch>. With the shortened form www.Rc-timing.ch often used the link offered by MyRCM at the events to all users will not work. Therefore please enter the complete link including <http://>. Only then a user can use the link to visit your website.

When you make changes here, please note that you have to click on Commit to become these changes effective.

4.4 Password change

If you want to change your password, you have to do it here. Please note, that a new password is not only effective on MyRCM but on RC-Timing too!

The screenshot shows the RC Timing website interface. The top navigation bar includes links for ONLINE EVENTS, UPCOMING EVENTS, ARCHIVE EVENTS, HOST, RACEREGISTRATION, SEARCH, and ADMINISTRATION. The ADMINISTRATION menu is expanded, showing options like Subscriptions, Event Administration, Account Settings, Password change (highlighted), Internal Messages, and MyRCM Downloads. The main content area displays the 'Password change' form with three input fields: 'Password to date', 'New password', and 'Re-enter new password'. A note below the fields states: '(The password must be at least 8 characters long.)'. A 'Commit' button is located at the bottom of the form. The footer shows visitor statistics and copyright information.

In the first line you are asked to enter your current password. The new password must be entered in the next line and has to be repeated for security issues in the line below. The password must be at least 8 characters long. If you commit the new password it will be effective from now on for the login on MyRCM as well as for the login on RC-Timing!

4.5 Internal messages

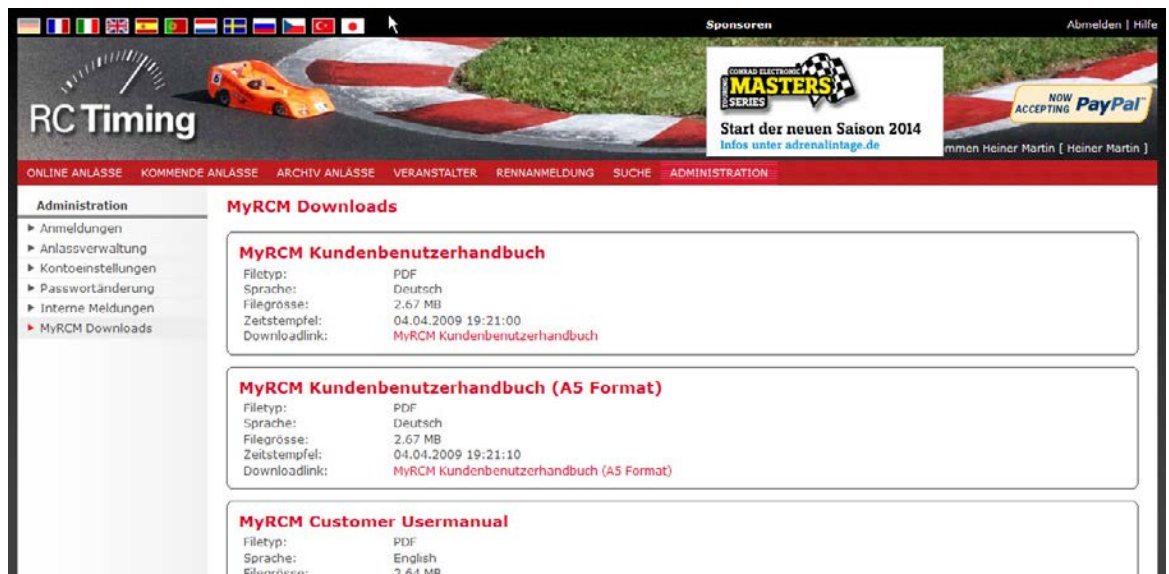

Here you see internal messages send by us.

The screenshot shows the RC Timing website interface with the 'Internal Messages' section selected in the ADMINISTRATION menu. The main content area displays a table with columns for Title, Status, Originator, and Timestamp. The table is currently empty, showing 'Results 0 - 0 from 0'. The footer shows visitor statistics and copyright information.

4.6 MyRCM Downloads

The handbooks for MyRCM will be found here.

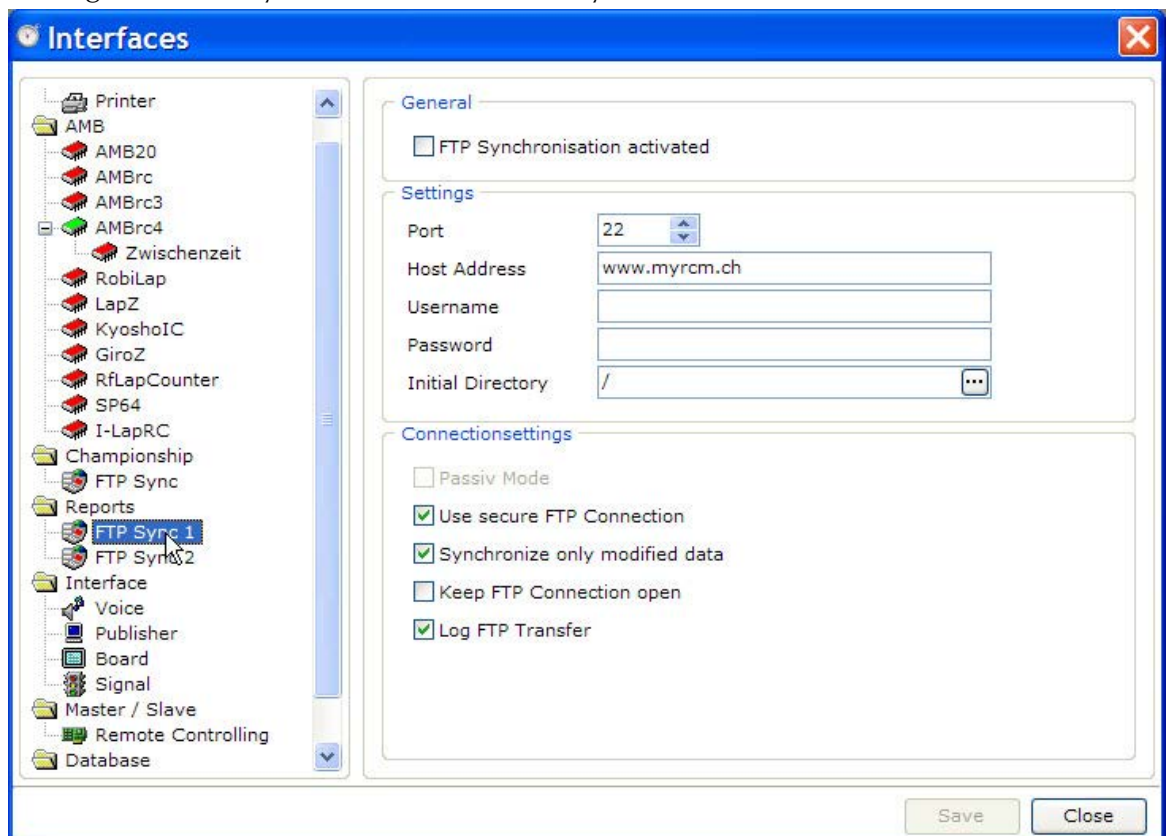

5 Upload an event to MyRCM

To publish the results of an event on MyRCM the computer where RCM Ultimate is running must have an internet connection.

5.1 Settings in RCM Ultimate

First of all you have to do the settings for the FTP connection in RCM Ultimate. In Settings/Interfaces you select WWW/FTP Sync 1.

Now you need the FTP Accessdata you got in the email mentioned under the item preparations:

FTP Accessdata (MyRCM Service)

Host: www.myrcm.ch

Port: 22

User: xxxxxx

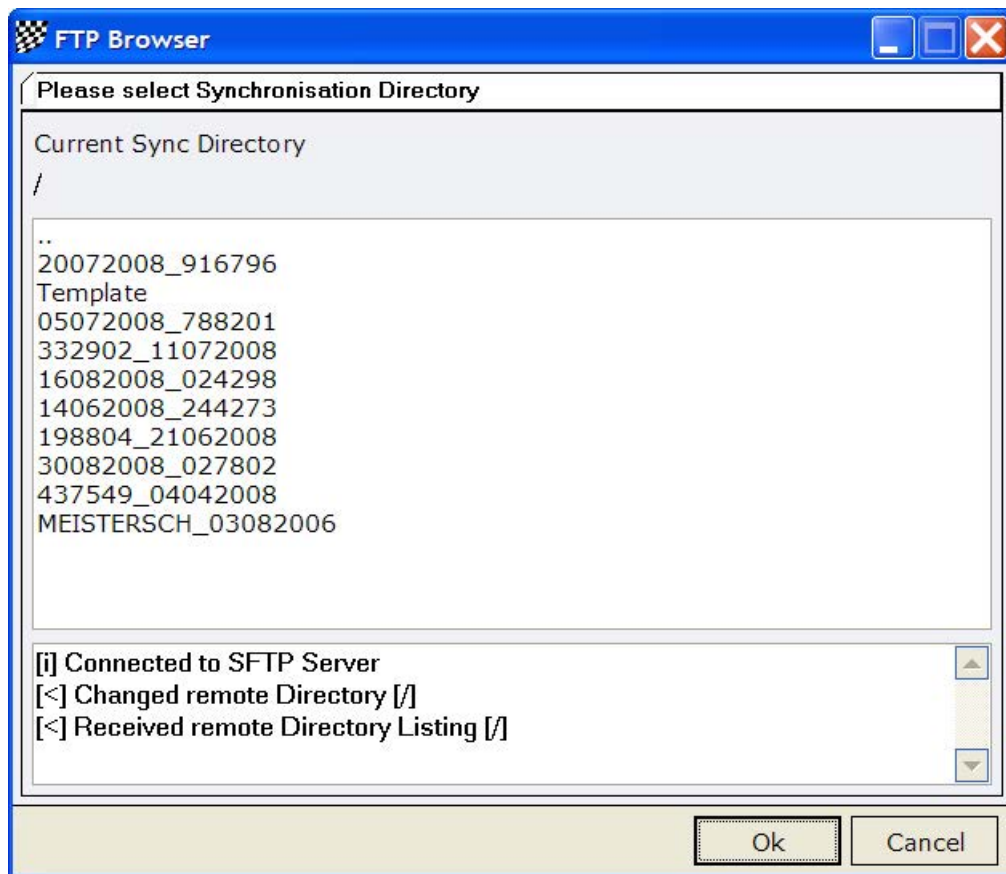

Passwd: xxx9XXx9

In the line Host Address you enter the mentioned host (www.myrcm.ch). In the line username you enter the User (xxxxxx) and in the Password line you enter the Passwd (xxx9XXx9). Last but not least you activate "FTP Synchronization activated" on top of the settings. Save the changes.

Now you can check the connection. Just click on the three dots at the end of the line "Initial Directory".

After some time you should see the message "Connected to SFTP server" in the lower part of the opening window. If Port 22 and a secure connection does not work, please deactivate the secure connection and use port 21.

Now you have to set in the details of your event that the event will be published on MyRCM. Load the event and go to Inventory data/Events. Lick on the event and then click on the tab detailview.

In the lower part of the window you have activate "Publish Event on MyRCM". Now you have to save the changes.

Please close RCM Ultimate now and restart it. Load the event and the information of the event is published on MyRCM. You can see the action RCM Ultimate is performing in the footer at FTP Sync 1. Here you have to see the messages "Connecting" and "Synchronizing" from time to time.

5.2 Running the event

If you use the same settings on the computer you use for the timekeeping on the race and this computer has an internet connection too, you have nothing to do. RCM Ultimate will update the results on MyRCM automatically again and again. You have nothing else to do as running the event as normal.

5.3 No Internet Connection at the Racetrack

In a lot of countries there are reasonable priced solutions available for an internet connection by mobile telephone. Nevertheless if you do not have an internet connection at your racetrack you can publish the results on MyRCM anyway (even after the event). When the event is finished you save the race data on a memory stick (for example) using Tools/Datamanagement/Export and then "Export active event" together with "Export Reports of active event".

At home you import this data to RCM Ultimate which runs on a computer with internet connection. Just use the function Tolls/Datamanagement/Import. Check the settings for the FTP Connection and check the settings in the event. Now close RCM Ultimate and restart it. Load the event and the data will be transferred to MyRCM

(Messages at FTP Sync 1: "Connecting" and Synchronizing"). This takes a little bit of time due to the amount of the data to be uploaded. You can check it with your internet browser on MyRCM. If the data synchronization is finished, you can close RCM Ultimate.

5.4 Event not shown on MyRCM

Please note, that the registration codes of the programs and the access-code to MyRCM are combined. Please use for all components the codes you got from RC-Timing. Otherwise the event is not shown on MyRCM. If you are not sure about the codes you have entered for the programs, please delete the file registration.ini in the folder "registration" of the program folder. Now start the program and you will be asked to enter again your codes.

6 Online Streaming

If you want to use Online Streaming you need an internet connection for the computer at your racetrack. Further on you have to order this service at RC-Timing. This service is valid for a year. You need the Programm RCM Web Publisher which is included in the Online Streaming Service. The installation and the settings needed in RCM Web Publisher are described in the user manuals of RCM Web Publisher. If the settings are made, this service will be run automatically by RCM Web Publisher. There is no further operation at the race necessary.

When running a race and when time keeping is running, you should see repeated messages "Synchronized data to MyRCM Service". If the message "Synchronisation failed" is displayed, the connection to MyRCM was lost. This can be caused by a break of your local connection to the internet. In this case please close RCM Web Publisher and restart it. If Web Publisher can not reconnect to MyRCM you have to

close Web Publisher, cancel your internet connection and reconnect it again. Now restart RCM Web Publisher.

7 Concluding Remarks

We wish you much success with www.myrcm.ch and www.Rc-timing.ch. If you have any questions or any problems please contact us. Simply write an email to support@Rc-timing.ch. Please do not forget to include the program name and the version number you are using. This will help us to answer your questions without any delay. If you are not known to us as a contact person of one of our customers, we should also know the contract number.
